WATER METER READINGS www.montealina.es

In the “**Owners**” section of the corporate website, www.montealina.es, you will find a direct link to “**Water Meter Readings**”, where you can access information related to water meter readings.

Since **2021**, the Monte Alina Community has had access to the **Hidroconta Metering** application, through which each resident can directly and at any time consult:

- The current reading of their water meter.
- The historical record of water consumption, hour by hour, with full detail of the readings.
- The ability to set alerts, for example, to establish a monthly consumption limit, detect anomalies that may indicate a water leak, identify situations such as malfunctioning automatic irrigation systems, or even determine whether there is activity in the home, among others.

This is an **external website** related to the Monte Alina Homeowners’ Association. Access requires a **username and password**, credentials that have already been provided. If you did not receive them or have forgotten them, you may request them by writing to administracion@montealina.es.

You may also download and install this application on your mobile phone via the “**Hidroconta Metering**” app, available on the **App Store** and **Google Play**, using the same credentials provided for the website.

The Monte Alina Homeowners’ Association assumes **no responsibility** for the content, operation, services, or information provided on these external websites. These links are provided solely for informational purposes or as a service to residents and do not imply any recommendation, verification, or endorsement of their content. Likewise, any modification or update of personal data must be carried out **exclusively through the Community Administration** by emailing administracion@montealina.es.

For any questions or issues, please contact the Administration by phone at **+34 91 352 13 43** or by email at administracion@montealina.es.
